

# LH 5052 RR/LFY

## TECH INFO SUMMARY

See the difference for yourself. LH 5052 RR/Lfy is a silage specific hybrid that has been developed for high yield silage production and whole plant digestibility. Lfy hybrids are a taller plant type with thinner rind, more leaves above the ear, and kernels that have a softer, more digestible endosperm. Plant LH 5052 RR/Lfy at lower populations than your grain hybrids to maximize it's true potential.
