## CORN HYBRIDS TECH INFO SUMMARY

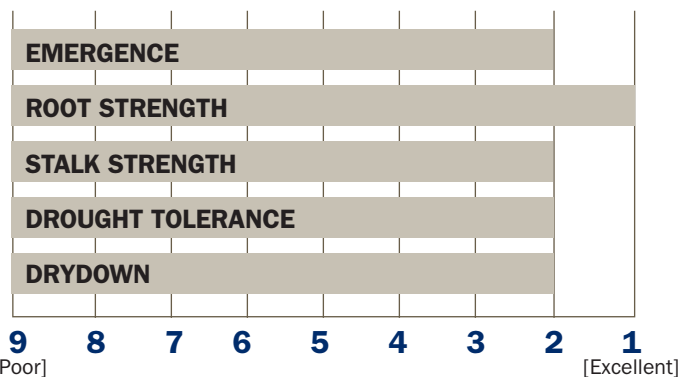

### POSITIONING AND MANAGEMENT

This 101-day hybrid comes with a good agronomic package. It's genetics are well adapted to the wet, cold soils in the spring and allow the seedlings to emerge from the ground like a rocket. This hybrid has a very good stalk strength and drydown. It's roots are the highest rated in our system. This is a good stress hybrid and well-balanced — a hybrid that you bring into your mix for stress tolerance but also have high yield potential where the conditions allow.
