

LH 6178 VT3

CORN HYBRIDS TECH INFO SUMMARY

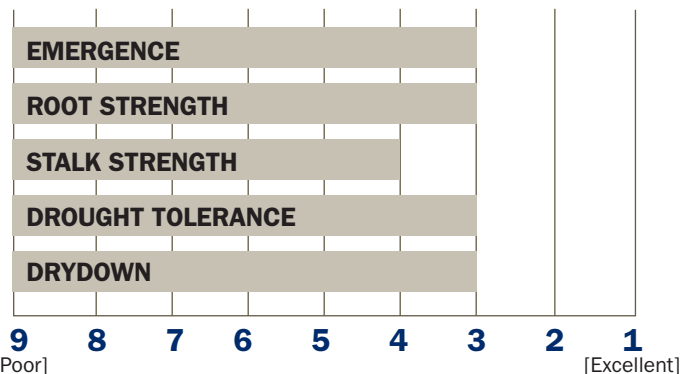

POSITIONING AND MANAGEMENT

LH 6178 VT3 shows excellent yield performance. The VT3 technology trait will show excellent rootworm control in both low and high rootworm pressure. This hybrid can be planted at a range of plant populations due to its few ear characteristics. The medium-tall plant and ear height allow this hybrid to demonstrate good canopy and harvestability in rolling ground. The good emergence score allows this hybrid to be planted early. This hybrid has some Southern genetic families, which gives it good drought tolerance. LH 6178 VT3 needs to be watched for stalks in the fall and harvested when its ready.
