

**L 3259 E3****3.2 RM****POSITIONING & MANAGEMENT**

"Widely adapted, excellent all-around line" is the best way to describe this product. It carries the Rps1-c gene for Phytophthora, strong tolerance to SCN and is resistant to Brown Stem Rot. Emergence and standability are excellent with above-average plant height. The overall plant type is somewhat thin with little branching so keep this soybean in narrower row spacings.

**TOP QUALITIES**

- This soybean is tolerant to STS herbicides
- Widely adapted east to west
- Great standability, very uniform
- BSR resistant, C gene for Phytophthora
- Pairs well with L 3095 E3
