

## SALT TOLERANT

### POSITIONING & MANAGEMENT

**LH 9300 ST** was developed to be productive in saline soils. Its branded root trait allows roots to remain above the water table. LH 9300ST adapts to a wide variety of soil types with outstanding forage yield under both highly productive or saline soils. It has an excellent disease package with resistance to a variety of insects and nematodes. LH 9300ST is an excellent choice for those looking to produce dairy quality hay.

### TOP QUALITIES

- Excellent forage yield
- Branded trait keeps roots above the water table
- Productive in saline soils
- Outstanding disease, insect and nematode resistance

### OVERALL CHARACTERISTICS

<b>Fall Dormancy</b>	3.8	<b>Disease Resistance Index</b>	28/35
<b>Winter Hardiness</b>	1.8	<b>Phytophthora Root Rot</b>	High Resistance
<b>Cuttings per Season</b>	3-4	<b>Aphanomyces Root Rot Race 1</b>	Resistant
<b>Forage Quality</b>	Very Good	<b>Aphanomyces Root Rot Race 2</b>	Resistant
<b>Regrowth After Cutting</b>	Moderate	<b>Anthracnose</b>	Resistant
<b>Leaf Style</b>	Trifoliolate	<b>Bacterial Wilt</b>	High Resistance
<b>Root Type</b>	30% Tap/70% Branch	<b>Verticillium Wilt</b>	High Resistance
<b>Stem Type</b>	Medium	<b>Fusarium Wilt</b>	High Resistance
<b>Wheel Traffic</b>	Very Good	<b>Lepto Leaf Spot</b>	Resistant
<b>Dry Soils</b>	Very Good	<b>Stem Nematode</b>	Resistant
<b>Heavy Wet Soils</b>	Excellent	<b>North Root-Knot Nematode</b>	High Resistance
		<b>Southern Root-Knot Nematode</b>	Resistant

**Rating Scale:** 1 = Excellent, 5 = Poor, N/A = Not Applicable
