

SALT TOLERANT

POSITIONING & MANAGEMENT

LH 9300 ST was developed to be productive in saline soils. It's branded root trait allows roots to remain above the water table. LH 9300ST adapts to a wide variety of soil types with outstanding forage yield under both highly productive or saline soils. It has an excellent disease package with resistance to a variety of insects and nematodes. LH 9300ST is an excellent choice for those looking to produce dairy quality hay.

TOP QUALITIES

- Exceptional performance in poorly drained soils
- Advanced rooting system
- High forage yields
- Excellent winter hardiness

OVERALL CHARACTERISTICS

Fall Dormancy	3.8	Disease Resistance Index	28/35
Winter Hardiness	1.8	Phytophthora Root Rot	High Resistance
Cuttings per Season	3-4	Aphanomyces Root Rot Race 1	Resistant
Forage Quality	Very Good	Aphanomyces Root Rot Race 2	Resistant
Regrowth After Cutting	Moderate	Anthracnose	Resistant
Leaf Style	Trifoliate	Bacterial Wilt	High Resistance
Root Type	30% Tap/70% Branch	Verticillium Wilt	High Resistance
Stem Type	Medium	Fusarium Wilt	High Resistance
Wheel Traffic	Very Good	Lepto Leaf Spot	Resistant
Dry Soils	Very Good	Stem Nematode	Resistant
Heavy Wet Soils	Excellent	North Root-Knot Nematode	High Resistance
		Southern Root-Knot Nematode	Resistant

Rating Scale: 1 = Excellent, 5 = Poor, N/A = Not Applicable
