

Upon signing your Latham® Dealer Agreement, you agree to both Latham Hi-Tech Seeds and our trait providers that you will only sell seed containing its patented traits to growers who have signed the trait provider(s)' required agreements and licenses within the United States. The dealer is responsible for confirmation of the grower's required license. (Reference Latham Seed Dealer Agreement.)

It is recommended that you contact the customer at the time of placing the seed order to verify his/her license number for each trait that is ordered. Each customer is required to be properly licensed before any seed will be delivered. Dealer account settlements will not be processed at the end of the year until all customer licenses have been confirmed. Unlicensed units will not receive any Latham discounts or programs.

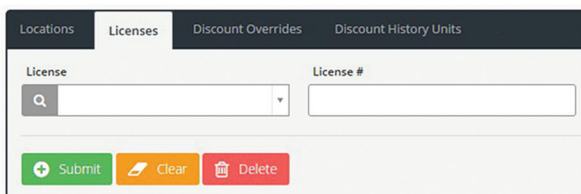

To remain in compliance, enter the order into SeedWare and verify that the customer has a current license for the trait ordered.

If a customer needs to submit a technology application, please contact the AgCelerate Support team at 866-768-6389 ([www.agcelerate.com](http://www.agcelerate.com)). Contact your Regional Sales Manager with any questions.

### LICENSE ENTRY & WIDGET

#### Enter a License Number

Log into SeedWare. Go to the customer data entry screen and click on the Licenses tab. Click drop-down box for a complete list of all license companies available. Enter the number. Click Submit and Save.

#### “Invalid License” Widget

Review customers with missing licenses in SeedWare at-a-glance.

Visit the Dealer Center for all of the latest downloads, tools and resources.
