POSITIONING & MANAGEMENT

L 2894 E3 is a medium-tall plant with terrific standability that works across many different soils and environments. The stress and heat tolerance it carries allows it to be placed in tougher soils while it maintains overall plant height. It is completely resistant to BSR and carries the K-gene for Phytophthora. The IDC score along with good lateral branching also allows it to be placed in those tough yellow, alkaline soils in many river bottoms.

TOP QUALITIES

- · Excellent stress tolerance, holds height
- Brown Stem Rot resistant
- Rps1-k gene for Phytophthora
- · Fairly tall with good lateral branching
- Pairs well with L 2624 E3 and L 3095 E3
